Yapılan İşlerin Konusu/ Field of Research/Work Conducted:

Project Planning & System Architecture

Yapılan İşler/Work-Research Being Performed:

I started thinking through the project idea properly today. I wanted to understand what an "AI-powered document pipeline" actually means before touching any tools, so I broke it down into three simple jobs: reading a document, understanding it and storing the result. That mental model made the whole thing feel a lot less intimidating.

By the end of the day I had a clear picture of the architecture in my head trigger, OCR, LLM extraction, storage and decided I wanted to build it without writing code to focus on understanding the concepts rather than getting stuck on syntax.
